Independent Auditor's Report
Statements of Financial Position
Statements of Operations and Comprehensive Loss
Statement of Changes in Shareholders' Equity
Statements of Cash Flows

Notes to the Financial Statements

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Shoal Point Energy Ltd.:

We have audited the accompanying financial statements of Shoal Point Energy Ltd., which comprise the statements of financial position as at January 31, 2018 and 2017, and the statements of operations and comprehensive loss, changes in shareholders' equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Shoal Point Energy Ltd. as at January 31, 2018 and 2017, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

Emphasis of Matter

Without qualifying our opinion, we draw attention to Note 1 in the financial statements which describe certain conditions that indicate the existence of a material uncertainty that may give rise to significant doubt about the Shoal Point Energy Ltd.'s ability to continue as a going concern.

1. REPORTING ENTITY AND GOING CONCERN

Shoal Point Energy Ltd. (the "Company") was incorporated on December 22, 2006 under the Business Corporations Act (Alberta). The Company was incorporated for the purpose of acquisition, exploration and development of oil and natural gas properties in Canada. The Company is headquartered at Suite 203 – 700 West Pender Street, Vancouver, B.C. V6E 3V7. On October 26, 2010, the Company filed articles of continuance in Ontario. On November 23, 2010, the Company began trading on the CNSX (now the CSE) under the symbol SHP.

Effective February 7, 2018, the Company consolidated its common shares on the basis of one new common share for every twenty-five old common shares issued and outstanding at that time (Note 13). All references to share and per share amounts in these financial statements have been retroactively restated to reflect the share consolidation.

The Company is in the exploration stage of exploring its oil and natural gas properties and has not yet determined whether these properties contain oil and natural gas resources that are economically recoverable, as a result, it is considered an exploration stage company. The recoverability of amounts shown for oil and natural gas properties is dependent upon the existence of economically recoverable reserves, securing and maintaining the title and beneficial interest in the properties, the ability of the Company to obtain necessary financing to complete the development and upon future profitable production or proceeds from disposition of the oil and natural gas properties. In November of 2013, the Minister of Natural Resources announced that applications for hydraulically fracturing wells would be not be accepted which effectively imposed a moratorium. In October 2014, the Government of Newfoundland appointed five members to the Newfoundland and Labrador Hydraulic Fracturing Review Panel ("NLFRP") to study the socio-economic and environmental impacts of hydraulic fracturing in western Newfoundland. The report was made public on May 31, 2016 recommending significant further study before hydraulic fracturing could be considered.

Shoal Point Energy Ltd. submitted a summary planning document to the applicable regulators in Newfoundland and Labrador ("C-NLOPB") which did not involve hydraulic fracturing. The Board of the C-NLOPB met on July 25, 2017 and voted to reject the Company's application to drill a new well. The Company has received a written response as to why the planning document was rejected and is currently assessing the Board's decision.

The Company has a need for equity capital and financing for working capital and exploration and development of its properties. Due to continuing operating losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. To continue as a going concern, the Company needs to raise the capital necessary to continue in its oil and natural gas exploration business and ultimately to achieve positive cash flow from operations. In the current economic market, there is no certainty that management will be successful in these efforts. Management intends to finance operating costs over the next twelve months with existing cash or private placements. These factors indicate the existence of a material uncertainty that may give rise to significant doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments relating to the recoverability and classification of assets and liabilities that might be necessary should the Company be unable to continue as a going concern. Subsequent to January 31, 2018, the Company completed an equity rights offering and issued a total of 21,770,810 common shares for total gross proceeds of \$1,088,541 (Note 13).

2. BASIS OF PRESENTATION

Statement of Compliance

The financial statements of the Company comply with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and interpretations of the International Financial Reporting Interpretations Committee ("IFRIC").

These financial statements were authorized for issue by the board of directors on May 30, 2018.

Basis of Measurement

The financial statements of the Company have been prepared on an accrual basis and are based on historical costs, modified where applicable. These financial statements are presented in Canadian dollars unless otherwise noted.

2. BASIS OF PRESENTATION (cont'd)

Functional and Presentation Currency

These financial statements are presented in Canadian dollars, which is the Company's functional currency.

Use of estimates and assumptions

The preparation of financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements, the reported amounts of revenues and expenses during the reporting period and contingent assets and liabilities. Significant estimates include the recoverability of the carrying value of oil and natural gas properties, the fair value measurements and assumptions relating to financial instruments and stock based transactions, the recognition and valuation of provisions for restoration and environmental liabilities, and the recoverability and measurement of deferred tax assets and liabilities.

The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised. Actual results could significantly differ from those estimates.

Significant judgments

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments applying to the Company's financial statements include the classification of expenditures on oil and natural gas assets and the going concern assumption.

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting polices set out below have been applied consistently to all periods presented in these financial statements.

OIL AND NATURAL GAS PROPERTIES (exploration and evaluation assets)

Exploration and evaluation ("E&E") expenditures incurred prior to acquiring the legal right to explore are charged to expense as incurred.

E&E expenditures incurred subsequent to acquisition of the legal right to explore, including license and property acquisition costs, geological and geophysical expenditures, costs of drilling exploratory wells and directly attributable overhead including salaries and employee benefits, are initially capitalized as E&E assets. Certain overhead costs are included in E&E.

All items currently in oil and natural gas properties are considered E&E properties under IFRS 6, "Exploration for and Evaluation of Mineral Resources". The Company's oil and natural gas properties are not subject to depletion and will be moved into developed oil and natural gas properties when they are determined to meet certain technical feasibility and commercial viability thresholds as determined by management. Upon transfer to developed oil and natural gas properties, these E&E assets are assessed for impairment to ensure that they are not carried at amounts above their recoverable values.

Exploration and evaluation assets are tested for impairment if facts or circumstances indicate that impairment exists. Examples of such facts and circumstances are as follows:

- the period for which the Company has the right to explore in the specific area has expired during the period or will expire in the near future, and is not expected to be renewed;
- substantive expenditure on further exploration for and evaluation of mineral resources in the specific area is neither budgeted nor planned;
- exploration for and evaluation of mineral resources in the specific area have not led to the discovery of commercially viable quantities of mineral resources and the entity has decided to discontinue such activities in the specific area; and
- sufficient data exist to indicate that, although a development in the specific area is likely to proceed, the carrying amount of the exploration and evaluation asset is unlikely to be recovered in full from successful development or by sale.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

EQUIPMENT

Recognition and Measurement

Equipment is measured at cost less accumulated depreciation and accumulated impairment losses. Cost includes all expenditures that are directly attributable to the acquisition of the asset.

Depreciation

Equipment is depreciated annually on a declining balance basis using rates of 20%-30% respectively.

Impairment

The carrying amounts of the Company's equipment is reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash on hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

ACCOUNTING FOR INCOME TAXES

Income tax expense is comprised of current and deferred tax expense. Current tax expense is the expected tax payable or receivable on the taxable income or loss for the period, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years. Deferred tax assets and liabilities are recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes.

Income tax expense is recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity. Income taxes are calculated using the asset and liability method of accounting for income taxes. Under the asset and liability method, deferred tax assets and liabilities are recognized for the deferred tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and for tax losses and other deductions carried forward.

Deferred income tax assets and liabilities are calculated using substantively enacted tax rates expected to apply when the asset is realized or the liability is settled. An asset is recognized on the statement of financial position when it is probable that the future economic benefits will flow to the entity and the asset has a cost or value that can be measured reliably. The effect on deferred tax assets and liabilities of changes in tax rates are recognized in income in the period in which the change is substantively enacted.

Deferred taxes are not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future.

BASIC AND DILUTED LOSS PER COMMON SHARE

The Company presents basic and diluted loss per share ("LPS") data for its common shares. Basic LPS is calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted LPS is determined by adjusting the loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares, which comprise the warrants and share options granted by the Company.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

SHARE-BASED PAYMENTS

Share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Under this method, the fair value of the equity-settled share-based payment is measured on the date of grant using the Black-Scholes Option Pricing Model, and is recognized as an expense or capitalized, depending on the nature of the grant, with a corresponding increase in equity, over the period that the employees earn the options. For options that do not vest immediately, the fair value is measured at the grant date and each tranche is recognized on a graded-vesting basis over the period in which the options vest. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest.

Equity-settled, share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service, using the Black-Scholes Option Pricing Model. The Black-Scholes Option Pricing Model requires the input of subjective assumptions, including the expected term of the option and stock price volatility.

RECLAMATION OBLIGATION

A legal or constructive obligation to incur restoration, rehabilitation, and environmental costs may arise when environmental disturbance is caused by the exploration, development, or ongoing production of an oil and natural gas property interest. The Company's exploration activities are subject to various governmental laws and regulations relating to the protection of the environment. These environmental regulations are continually changing and are generally becoming more restrictive.

The fair value of the liability for a reclamation obligation is recorded when it is incurred and is measured at the net present value. The corresponding increase to the asset is amortized over the life of the asset. The liability is adjusted each period for the unwinding of discount with the associated expense included in net loss.

The Company has made, and intends to make in the future, expenditures to comply with such laws and regulations.

WARRANTS

Proceeds from unit placements are allocated first to shares and then to warrants for any residual value. The fair value of the share component is credited to share capital and the value of the warrant component is credited to the warrants account. Upon exercise of the warrants, consideration paid by the warrant holder together with the amount previously recognized in the warrants account is recorded as an increase to share capital. Broker warrants issued separately are valued using the Black-Scholes Option Pricing Model.

RESERVES

Warrant reserve

The warrant reserve records the value recognized of warrants issued with respect to financings, until such time as the warrants are exercised, at which time the corresponding amount will be transferred to share capital. If the warrants expire unexercised, the amount remains in the reserve account.

Contributed surplus

Contributed surplus records items recognized as stock-based compensation expense until such time that the stock options are exercised, at which time the corresponding amount will be transferred to share capital. If the options expire unexercised, the amount remains in the reserve account.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

FOREIGN CURRENCY TRANSLATION

The Company's functional and presentation currency is the Canadian dollar. Foreign currency transactions are initially recorded in the functional currency at the transaction date exchange rate. At closing date, monetary assets and liabilities denominated in a foreign currency are translated into the functional currency at the closing date exchange rate, and non-monetary assets and liabilities at the historical rates. Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are recognized in profit or loss.

FINANCIAL INSTRUMENTS

Financial Assets and Liabilities

The Company recognizes a financial asset or financial liability when, and only when, it becomes a party to the contractual provisions of the instrument. Such financial assets or financial liabilities are initially recognized at fair value and the subsequent measurement depends on their classification.

Fair value through profit and loss

Financial assets classified as fair value through profit and loss ("FVTPL") are measured at fair value with any resultant gain or loss recognized in profit or loss.

Loans and receivables

Loans and receivables are financial assets with fixed or determinable payments that are not quoted in an active market. Such assets are recognized initially at fair value plus any directly attributable transaction costs. Subsequent to initial recognition, loans and receivables are measured at amortized cost using the effective interest method, less any impairment losses. The Company has classified cash and the reclamation deposit as loans and receivables.

Available-for-sale

Financial assets classified as available-for-sale are measured at fair value with any resultant gain or loss being recognized directly in other comprehensive income. Investments in equity instruments classified as available-for-sale that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at cost. When available-for-sale financial assets are derecognized, the cumulative gain or loss previously recognized directly in equity is recognized in profit or loss.

Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial assets, the estimated future cash flows of the investment have been negatively impacted. Evidence of impairment could include:

- Significant financial difficulty of the issuer or counter party; or
- Default or delinquency in interest or principal payments by the borrower; or
- It becomes probable that the borrower will enter into bankruptcy or financial reorganization.

The carrying amount of the financial asset is directly reduced by any impairment loss.

Other liabilities

Trade payables are classified as other liabilities at amortized cost. The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities are recognized initially on the trade date at which the Company becomes a party to the contractual provisions of the instruments.

3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)

FINANCIAL INSTRUMENTS (cont'd)

The Company derecognizes a financial liability when its contractual obligations are discharged, cancelled or expired.

Financial assets and liabilities are offset and the net amount is presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends to either settle on a net basis or to realize the assets and settle the liability simultaneously.

PROVISIONS

A provision is recognized when the Company has a present legal or constructive obligation as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be reliably estimated. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

A provision for onerous contracts is recognized when the expected benefits to be derived by the Company from a contract are lower than the unavoidable cost of meeting its obligations under the contract.

SHARE ISSUANCE COSTS

Professional, consulting, regulatory fees and other costs that are directly attributable to the issuance of shares are charged to share capital when the related shares are issued, net of any tax effects. Transaction costs of abandoned equity transactions are recognized in profit and loss.

ACCOUNTING STANDARDS ISSUED BUT NOT YET EFFECTIVE

New standard IFRS 9 "Financial Instruments" is a partial replacement of IAS 39 "Financial Instruments: Recognition and Measurement". IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets.

The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. The Company does not expect the adoption of IFRS 9 to have a material effect on the financial statements.

IFRS 16 "Leases" replaces IAS 17 "Leases" and the related interpretative guidance. IFRS 16 applies a control model to the identification of leases, distinguishing between a lease and a service contract on the basis of whether the customer controls the asset being leased. For those assets determined to meet the definition of a lease, IFRS 16 introduces significant changes to the accounting by lessees, introducing a single, on-balance sheet accounting model that is similar to current finance lease accounting, with limited exceptions for short-term leases or leases of low value assets. Lessor accounting is not substantially changed. The standard is effective for annual periods beginning on or after January 1, 2019, with early adoption permitted for entities that have adopted IFRS 15. The Company has not yet assessed the future impact of this new standard on its financial statements.

Other accounting standards or amendments to existing accounting standards that have been issued but have future effective dates are either not applicable or are not expected to have a significant impact on the Company's financial statements.

4. FINANCIAL RISK AND CAPITAL MANAGEMENT

The Company is exposed in varying degrees to a variety of financial instrument related risks. The Board of Directors approves and monitors the risk management processes, inclusive of documented investment policies, counterparty limits, and controlling and reporting structures. The type of risk exposure and the way in which such exposure is managed is provided as follows:

Credit risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Company's primary exposure to credit risk is on its cash held in bank accounts. All of the cash is deposited in bank accounts held with one major bank in Canada. Since all of the Company's cash is held by one bank there is a concentration of credit risk. This risk is managed by using major banks that are high credit quality financial institutions as determined by rating agencies.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company has a planning and budgeting process in place to help determine the funds required to support the Company's normal operating requirements on an ongoing basis. The Company ensures that there are sufficient funds to meet its short-term business requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company's access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

Foreign exchange risk

Foreign currency risk is the risk that the fair values of future cash flows of a financial instrument will fluctuate because they are denominated in currencies that differ from the respective functional currency. The Company does not have any direct exposure to foreign exchange risk.

Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have any significant interest rate risk.

Capital Management

The Company's policy is to maintain a strong capital base so as to maintain investor and creditor confidence, safeguard the Company's ability to support the exploration and development of its exploration and evaluation assets and to sustain future development of the business. The capital structure of the Company consists of equity and debt obligations, net of cash.

There were no changes in the Company's approach to capital management during the year and no restrictions.

4. FINANCIAL RISK AND CAPITAL MANAGEMENT (cont'd)

Classification of financial instruments

Financial assets included in the statements of financial position are as follows:

	January 31, 2018	January 31, 2017		
Loans and receivables:				
Cash	\$ 4,068	\$ 36,273		
Term deposit	11,000	436,000		
Reclamation deposit	50,000	50,000		
	\$ 65,068	\$ 522,273		

Financial liabilities included in the statements of financial position are as follows:

	Jan	January 31, 2018		
Non-derivative financial liabilities:				
Trade payables	\$	34,707	\$	20,363
Loan payable		35,547		-
	\$	70,254	\$	20,363

Fair value

The fair value of the Company's financial assets and liabilities approximates the carrying amount.

5. RECLAMATION DEPOSIT

The reclamation deposit consisted of an interest-bearing guaranteed investment certificate that secures a stand-by letter of credit in the amount of \$1,000,000 with the Canada-Newfoundland and Labrador Offshore Petroleum Board ("C-NLOPB"). The guaranteed investment certificate had a maturity of December 24, 2016, and bore interest at 0.40%. The letter of credit was issued to the C-NLOPB for any future environmental remediation work that may be required with respect to the areas covered by exploration license #1070. In March 2016, the C-NLOPB returned the stand-by letter of credit in the amount of \$1,000,000 to the Company as a result of new regulations taking effect on February 26, 2016. The Company posted a \$50,000 deposit with the Department of Natural Resources of Newfoundland and Labrador in August 2016.

The Company currently has exploration license 1070 ("EL 1070") off the west coast of Newfoundland which total approximately 150,000 acres. In November of 2013, the Minister of Natural Resources announced that applications for hydraulically fracturing wells would not be accepted which effectively imposed a moratorium. In October 2014, the Government of Newfoundland appointed five members to the Newfoundland and Labrador Hydraulic Fracturing Review Panel ("NLFRP") to study the socio-economic and environmental impacts of hydraulic fracturing in western Newfoundland. The report was made public on May 31, 2016 and recommends, among other things, significant further study before hydraulic fracturing could be considered. The Company originally anticipated that it would use hydraulic fracturing to achieve commercial production. The Company submitted a summary planning document to the applicable regulators in Newfoundland and Labrador ("C-NLOPB") which did not involve hydraulic fracturing. The Board of the C-NLOPB met on July 25, 2017 and voted to reject the Company's application to drill a new well. As a result, the Company recorded an impairment of \$5,689,832 to reduce the carrying value to an estimated net realizable amount of \$2,000,000 as at January 31, 2018.

7. LOAN PAYABLE

During the year ended January 31, 2018, the Company received a total of \$35,000 from the former CFO of the Company, which was a loan made to the Company to finance its activities in order to continue its operations. The loan was due on demand, unsecured, had no maturity date and bore interest at a rate of 10% per annum. Interest accrued on the loan was \$547 as at January 31, 2018. Subsequent to January 31, 2018, the Company repaid the outstanding balance of the loan in full.

8. EQUITY INSTRUMENTS

(a) Share Capital

Shares issued during the year ended January 31, 2018

There were no share issuances for the year ended January 31, 2018.

Shares issued during the year ended January 31, 2017

In March 2016, the Company issued 40,000 units at a price of \$0.125 per unit for gross proceeds of \$5,000. Each unit consisted of one common share and one common share purchase warrant where a warrant entitles the holder to acquire one additional share at a price of \$1.25 for a period of 5 years. The Company incurred share issue costs in connection with the private placement of \$1,150.

(b) Share consolidation

Effective February 7, 2018, the Company consolidated its common shares on the basis of one new common share for every twenty-five old common shares issued and outstanding at that time. All references to share and per share amounts in these financial statements have been retroactively restated to reflect the share consolidation.

8. EQUITY INSTRUMENTS (cont'd)

(c) Stock option plan and stock-based compensation

The Company has a stock option plan to provide employees, directors, officers and others providing consulting services with options to purchase common shares of the Company. Under the plan, the exercise price of each option equals the market price of the Company's stock on the day of grant and the maximum term of an option is five years. The maximum number of shares which may be issued under the program shall not exceed 10% of the issued and outstanding shares.

The following table summarizes information concerning the Company's stock options outstanding:

	January 31, 2018		January 31	l, 2017		
		We	ighted		W	eighted
	Number of options	av exercise	verage e price	Number of options		e price
Options outstanding, beginning	1,660,000	\$	1.25	1,740,000	\$	1.25
Options expired	-			(80,000)		1.25
Options outstanding, ending	1,660,000	\$	1.25	1,660,000	\$	1.25
Options exercisable, ending	1,660,000	\$	1.25	1,660,000	\$	1.25

Details of options outstanding as at January 31, 2018 are as follows:

Weighted average	Weighted average	Number of options
exercise price	contractual life	outstanding
\$3.75	0.11 years	20,000(1)
\$1.25	3.55 years	1,640,000
\$1.25	3.51 years	1,660,000

⁽¹⁾ These options expired unexercised subsequent to January 31, 2018.

The grant date fair value of share purchase options granted during the year ended January 31, 2015 of \$422,960 has been estimated using the Black-Scholes Option Pricing Model with the following weighted-average assumptions: market value of underlying stock of \$0.25; risk free rate of 1.52%; expected term of 5.79 years; exercise price of the option of \$1.25 per share; volatility of 221%; and expected future dividends of nil, for a weighted average grant date fair value of \$0.0098 per option. One third of the options vested on the grant date, one third vest one year after the grant date, and one third vest two years after the grant date. During the year ended January 31, 2018, stock based compensation of \$nil was recognized (2017 – \$38,767).

(d) Warrants

The following table summarizes warrants that have been issued, exercised or have expired during the year ended January 31, 2018:

	January 31, 2018			January 31, 2	017	
	Weighted Number of average		Number of		eighted	
	warrants	exercise	verage e price	warrants		iverage se price
Warrants outstanding, beginning	2,760,640	\$	1.25	3,020,640	\$	1.25

Warrants expired	=			(300,000)		1.25
Warrants outstanding, ending	2,760,640	\$	1.25	2,760,640	\$	1.25

8. EQUITY INSTRUMENTS (cont'd)

(d) Warrants (cont'd)

All warrants outstanding as at January 31, 2018 vested on the grant date. The warrants entitle the holders to purchase the stated number of common shares at the exercise price on or before the expiry date. At January 31, 2018, the following warrants were outstanding:

		Weighted average remaining
Exercise price	Number outstanding	contractual life (in years)
\$1,25	2,485,600	2.56
\$1,25	235,040	2.74
\$1,25	40,000	3.12
	2,760,640	2.58

9. COMMITMENTS AND CONTINGENCIES

The Company was named as a defendant in a \$3,414,000 lawsuit relating to seismic data which the litigant, Geophysical Services Inc., claims was disclosed by NWest Oil & Gas Inc. ("NWest") to the Company when the Company acquired certain acreage from NWest in a prior year. Management believes the claim to be frivolous towards the Company and without merit. The Company has filed a Summary Dismissal Application with the Alberta Court. A date for hearing of this Application has not been set. No loss provision has been recorded.

In February 2015, Irwin Lowy LLP filed a claim against the Company for \$66,469 for unpaid legal services. The Company is contesting this amount and filed a counter-claim along with a statement of defense which seeks an offset of this amount. No loss provision has been recorded as a result.

10. RELATED PARTY TRANSACTIONS

Key management consists of the Company's directors and officers. Details of key management compensation are as follows:

	January 31,			January 31,	
		2018	2017		
Management salaries	\$	164,600	\$	201,600	
Stock-based compensation		-		22,539	
	\$	164,600	\$	224,139	

During the year ended January 31, 2018, the Company received a total of \$35,000 from the former CFO of the Company, which was a loan made to the Company to finance its activities in order to continue its operations. The loan was due on demand, unsecured, had no maturity date and bore interest at a rate of 10% per annum. Interest accrued on the loan was \$547 as at January 31, 2018. Subsequent to January 31, 2018, the Company repaid the outstanding balance of the loan in full.

11. BASIC AND DILUTED LOSS PER SHARE

Basic loss per share has been calculated by dividing the net loss per the financial statements by the post 25:1 share consolidation weighted average number of common shares outstanding during the period. The fully diluted loss per share would be calculated using a common share balance increased by the number of common shares that could be issued on the exercise of outstanding warrants and options of the Company. As the Company is in a loss position for the years ended January 31, 2018 and 2017, the inclusion of options and warrants in the calculation of diluted earnings per share would be anti-dilutive, and accordingly, were excluded from the diluted loss per share calculation.

12. INCOME TAXES

The movement in deferred tax in the statement of financial position and the Company's deferred tax assets and liabilities are as follows:

Nature of temporary differences		2018	2017
Oil and natural gas property	\$	12,043,092	\$ 10,392,793
Cumulative eligible capital		38,472	41,368
Share issuance costs and other		4,296	16,520
Non-capital losses		4,797,375	4,678,577
		16,883,235	15,129,258
Deferred tax assets not recognized	((16,883,235)	(15,129,258)
	\$	-	\$ -

Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable income will be available against which the Company can utilize the benefits.

Income taxes differ from that which would be expected from applying the combined effective Canadian federal and provincial tax rates of 29% (2017 - 29%) to the loss before income taxes as follows:

	 2018	2017
Expected tax recovery	\$ (1,757,002) \$	(124,245)
Stock based compensation costs and other non-deductible expenses	-	12,303
Change in tax rate and other	3,025	4,569
Change in deferred tax assets not recognized	 1,753,977	107,373
	\$ - \$	-

As at January 31, 2018 the Company has non-capital losses of \$16,542,674 that can be used to reduce future taxable income. These losses expire as follows:

2027	\$ 877,951
2028	1,587,145
2029	2,720,988
2030	1,854,414
2031	772
2032	3,905,473
2033	730,261
2034	2,512,171
2035	730,551
2036	654,913
2037	558,385
2038	 409,650
	\$ 16,542,674
	 •

13. SUBSEQUENT EVENTS

Share Consolidation

Effective February 7, 2018, the Company consolidated its common shares on the basis of one new common share for every twenty-five old common shares issued and outstanding at that time. All references to share and per share amounts in these financial statements have been retroactively restated to reflect the share consolidation.

13. SUBSEQUENT EVENTS (cont'd)

Rights Offering

On March 13, 2018, the Company completed an equity rights offering (the "Rights Offering") and issued a total of 21,770,810 common shares raising total gross proceeds of \$1,088,541. In consideration for providing a standby commitment, certain individuals were granted, in aggregate, 2,500,000 warrants, each warrant entitling the holder to subscribe for one common share at \$0.06 per share until March 13, 2021.

Stock Options

On March 15, 2018, the Company granted 2,600,000 stock options to certain directors, employees, advisors and consultants exercisable at \$0.07 per share with an expiry date of March 15, 2023. 2,500,000 of these stock options vested upon grant, and 100,000 of these stock options vest in four equal instalments with the first tranche vesting upon grant and the rest every six months thereafter.
